# The Icon for the Bathroom.

Design by **STUDIO F·A·PORSCHE**

An unmistakable design language that evokes emotions and tugs at the heartstrings. Artweger, the specialist and pioneer in showers and baths, has teamed up with Studio F. A. Porsche to bring you a legendary design for the bathroom.

Artweger PRESTIGE is a unique design object that plays a pioneering role in terms of technology but is still affordable. The radically minimalist design, in which the hinge and profile merge into a slim, efficient unit, clearly bears the signature of the renowned design studio Studio F. A. Porsche. It combines a straightforward, simple look with the unique functionality of the patented 360° hinge.

**The best proof: A prestigious object is also available in premium quality at an affordable price**

Under reasonable conditions: Despite its striking design concept and superior functionality, the PRESTIGE is in the mid-price category, making it a real price-performance champion.

Revolutionary Design.  
Innovative Functions.  
**Artweger PRESTIGE.**

Door in an alcove with 2 fixed parts, frame colour Optic Nickel

### **Uniform Metal Surface**

The unique look does not require any disruptive plastic parts for hinges and profiles. This seemingly small step has a big advantage: We guarantee consistent colours from a single cast.

# Stylistically Defining Design.

Design by **STUDIO F·A·PORSCHE**

## A Sight that Moves You

Together with Studio F. A. Porsche, we have developed PRESTIGE, a unique rotating tube shower cubicle that opens 180° inwards and 180° outwards. The entire profile with the rotating tube hinge is surprisingly only 38 millimetres wide - making it one of the narrowest on the market.

## Reduced to the Essentials

Round and angular: Precisely because the design language has been consistently reduced to these two basic geometric shapes, this shower cubicle stands out. The design is unobtrusive, discreet and light, without appearing fragile.

With a width of just 38 millimetres, the hinge is one of the narrowest on the market.

The stabilisers harmonise perfectly with the hinges.

# PRESTIGE, a Good Feel for the Bathroom.

The two designer handles with rubberised grip section or knurled metal surface are easy to hold, even with wet hands, and the rubberised front surface provides a gentle stop when opening the doors.

Standard Handle

Premium Handle

# Minimalism with Unique Elegance.

In close collaboration with the legendary Studio F. A. Porsche, Artweger has designed a unique shower cubicle. The design of Studio F. A. Porsche is consistently characterised by its clear design language. The Artweger PRESTIGE also impresses with its strong focus on round and angular shapes which gives it a striking appearance. Its design is restrained, unobtrusive and yet robust without giving the impression of fragility. This targeted restriction to elementary geometric shapes gives the shower cubicle a unique aesthetic that is both modern and timeless. This and the sturdy construction emphasise the high standards of sustainability.

## **Studio F. A. Porsche – Design for Eternity**

Studio F. A. Porsche is a premium design agency that designs products for clients worldwide, turns brands into an experience and brings the highest standards into perfect form. In 1963, Ferdinand Alexander Porsche designed the Porsche 911, a sports car that remains iconic to this day and which illustrates his design maxims. Optimising the function, reducing the form to its essentials and overcoming the familiar in order to keep discovering new, better solutions.

“The PRESTIGE is an evolutionary further development of the modern shower cubicle through consistent reduction to essential elements”

Henning Rieseler, Design Director Studio F. A. Porsche

## Innovative Design

At the centre of the Artweger PRESTIGE is the completely new, discreet continuous 360° rotating tube. The hinge function has been fully integrated into the bar profile. The hinge is therefore no longer directly visible and is perceived at first glance as a narrow, continuous profile - both elements thus form a structural unit.

Corner entry attached  
on 2 fixed parts, frame colour  
Graphite metallic

### Expert tip

The 360° hinge creates WALK IN solutions where open showers would otherwise be impossible. With the WALK IN VARIO, a fixed glass panel is attached to a glass section that can be moved through 360°, thus enabling access to the shower area even in narrow niches.

# 360°

## Perfection & Precision

The innovative 360° rotating tube impresses all round. This is because it enables unique design solutions even in small bathrooms that cannot be realised with a conventional pivot hinge.

The swing door on the fixed section can easily be opened 180° inwards and 180° outwards, offering unimagined possibilities, especially in small bathrooms - and where there is little space to open the door.

360°

Walk In VARIO, frame colour Graphite metallic,  
Mirror Soft glass

### Practical

The movable glass section can be folded away completely inwards or outwards or used at a 90° angle inwards as an additional splash guard.

# Artweger has got the hang of it with PRESTIGE.

Double swinging door in alcove, frame colour Optic Copper, shower tray Artstone Anthracite.

## Raise and Lower Mechanism

On opening, the raise and lower mechanism gently lifts the door section so that the seal does not drag across the floor. For maximum sealing, it is lowered on closing.

## One PRESTIGE, Two Solutions

Models with fixed parts (pictured above) allow a movement of up to 360°. Models with a rotating tube on the wall (pictured right) allow the door to move 180°.

### Longer Brilliant Optics

To ensure that the elegant beauty lasts a particularly long time: The internal trimming of the fixed wall profile skilfully conceals the silicone joints.

### VARIO Sealing System

Completely watertight thanks to the optional surge bar (12 mm) in the door area or completely barrier-free? With the VARIO sealing system, you can choose freely between these two variants.

### Double Sealing

Regardless of whether the door opens inwards or outwards, thanks to two concealed vertical seals, the connection between the door and the fixed part is tight in any door position.

### Consistent Design

Stable, elegant and slim: The stabilisers mirror the curves of the rotating tube and guarantee that the shower cubicle stands securely.

GLASS

# Clean less for the lifetime of the shower.

**Only from Artweger:** UV-treated glass surface  
for permanently less cleaning effort!

Glass surface without coating or  
finishing

ARTCLEAR GLASS with UV-treated glass  
surface, the protection lasts the whole  
lifetime of the shower.

The unique ARTCLEAR GLASS is available as an option for all Artweger PRESTIGE models. Thanks to the specially treated, water-repellent surface, the glass is protected against ageing and glass corrosion and remains clear for the whole lifetime of the shower.

Limescale and dirt do not find a hold. For you, this means that with ARTCLEAR GLAS, daily wiping down or wiping the shower glass dry is a thing of the past, and cleaning is made considerably easier. All you need to do is rinse the glass panels using the hand shower and wipe off any residues with a damp cloth once a week.

Clean glass a shower life long!

ARTCLEAR GLASS is a new, permanently easyclean glass for shower enclosures. It's surface is specially treated and hardened by UV exposure. Water beads off, lime and dirt hardly find a hold. Your glass is protected for a showerlife, the cleaning effort is minimised.

## 360° hinge on the fixed part

On models with the door on a fixed glass section, the door opens up to 180° inwards and 180° outwards.

## 180° hinge on the wall

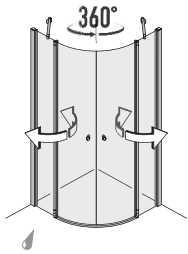

On models with the door directly on the wall, the door opens up to 90° inwards and 90° outwards.

## The fine ART of bathing

### **Definitely the right choice!**

Founded over 100 years ago, the name Artweger today stands for innovative ideas, functional details and aesthetic product design.

### **Dedicated to convenience**

What drives us every day: We want to make your life more enjoyable and convenient. With our unique products, genuine added value and a quality standard that lasts a showering lifetime. And this is how we inspire customers throughout Europe.

### **We listen carefully**

Artweger is one of the leading companies for shower cubicles and multifunctional showers for good reason. This is because we develop our products and customised services based on customer requirements.

### **We do not accept compromises**

We have high standards for ourselves - and for our suppliers. After all, we want to impress you with first-class quality. So we check every part down to the last detail before we approve it for production. And if something does not meet our standards, we produce it ourselves. After all, the quality of your shower cubicle is the sum of the quality of all the individual parts.
